

NEED VAX-D SERVICE?

September 2009

Dear VAX-D Provider:

One of the things that most VAX-D clinics can't afford is down time of equipment. Any delays in your treatment schedules can back things up for weeks. If you haven't had your VAX-D Table and Console serviced in the past year, then your equipment is probably due for a check up, some maintenance, and calibrated to VAX-D factory specifications.

VAX-D wants to let you know that **Complete Therapy Systems** is one of our authorized service providers.

Complete Therapy Systems, LLC
8845 Gullatt Rd.
Palmetto, GA. 30268

(office) 770-774-1515
(fax) 770-774-1516
(cell) 678-772-7370

Contact: Mr. Eddie Privett

Complete Therapy Systems has provided service for VAX-D equipment for more than ten years. We recommend that VAX-D Tables be serviced at least twice a year to prevent breakdown and down-time for your patients.

Also, with years of use, the equipment may need to be calibrated to ensure that the tensions shown on the console are the actual tensions being applied to your patients. Call Complete Therapy Systems to service and calibrate your equipment.

Sincerely,

VAX-D Medical Technologies

Dr. Lawrence A. Dyer
Vice President
